CAREER OBJECTIVE

An enthusiastic student and person eagerly waiting to contribute to team and organization success through commitment, attention to detail, collaboration, hard work, and dedication to implementing a growth mindset. Had a clear understanding of responsibilities and priorities. Aiming to excel in the tech industry.

EDUCATION

- | | |
|---|------------------|
| • GMR Institute of Technology | 2021-2025 |
| Bachelor of Technology | CGPA: 9.45 |
| • Oxford Junior college | 2019-2021 |
| Board of Intermediate Education, Andhra Pradesh | Percentage: 98.4 |
| • Oxford school | 2018-2019 |
| Board of Secondary Education, Andhra Pradesh | GPA: 10 |

INTERNSHIPS

- | | |
|-------------------|-------------------|
| • Schemax Tech | Summer internship |
| Dot Net framework | Visakhapatnam |

PERSONAL PROJECTS

– TO DO LIST

The MERN Stack To-Do List Application is a modern web app for efficient task management. It features user authentication, CRUD operations for tasks, categorization, and due dates. Built with MongoDB, Express.js, React, and Node.js, it ensures a responsive and seamless experience across devices.

* Tools & technologies used: vs-code, React.js, MongoDB, Express.js, Node.js

– Notes Application

The MERN stack Notes application enables users to create, edit, and manage Note posts seamlessly. Utilizing MongoDB, Express.js, React, and Node.js, it offers a dynamic and responsive user experience. Features include user authentication, real-time updates, and an intuitive interface for enhanced content management and interaction.

* Tools & technologies used: vs-code, React.js, MongoDB, Express.js, Node.js

– Calorie Expenditure Calculator

I developed a calculator using an Artificial Neural Network and MERN Stack , during which I extensively learned about hyper-parameter tuning and thoroughly understood ANN fundamentals and concepts, including layers, activation functions, model training, and model evaluation. Additionally, I created a MERN stack application to track records, integrating MERN stack and machine learning.

– Quiz Application

The Quiz App is a React.js-based web application that offers users a platform to take quizzes on various topics. It features a responsive design, dynamic question loading, real-time feedback, and score calculation. The app uses modern web practices like React hooks for state management and CSS-in-JS for styling. It's a user-friendly and accessible tool, making it ideal for both learning and entertainment purposes.

* Tools & technologies used: vs-code, React.js, HTML, CSS, JavaScript

TECHNICAL SKILLS AND INTERESTS

Technical Skills: Machine Learning, Deep Learning, MERN stack, Python, Java, HTML, CSS, Metasploit Framework

Soft Skills: Teamwork, Problem-solving, Time Management, Creativity, Communication:

Field of Interest: Data Science, Web Development, Artificial Intelligence, Augmented Reality and Virtual Reality, Generative AI,

Large Language Models

Hobbies: Coding Cooking, Playing Outdoor Games, Browsing Internet

POSITIONS OF RESPONSIBILITY

– **Position, Web developer Backend lead** Google developer student club *Position tenure* -

Led the backend development for Google Developer Student Club projects, coordinating with team members to design and implement robust server-side solutions.

ACHIEVEMENTS

- * Secured 2nd place for SPAN (Switched Port Analyzer) in the Machine category at Stepcone GMRIT.
- * Participated in Webthon at Stepcone GMRIT.
- * Participated in Web-o-stav at Stepcone GMRIT.

CERTIFICATIONS

- * Python for Data Science in NPTEL
- * Machine Learning with Python in EDX.
- * Web development using MERN stack in udemy.
- * Programming in Python in Coursera.
